PROFESSIONAL SUMMARY

Pragmatic, NIIT-certified software developer and Marine Engineering student at Nigeria Maritime University specializing in native mobile engineering (Kotlin, Jetpack Compose, Room DB, Google ML Kit), full-stack web platforms (Next.js 16/15, React 19, TypeScript, Supabase), brand systems (logo and visual identity), and automated growth infrastructure (technical SEO, Google Business architecture, Paystack rails, WhatsApp ad funnels). Proven track record of launching real products from zero to production with active user adoption and verifiable engineering deliverables.

TECHNICAL SKILLS & TOOLING

Languages: TypeScript, Kotlin, Python, SQL (PostgreSQL), JavaScript (Node.js/ESM), HTML5, Modern CSS3

Mobile Engineering: Android Native, Jetpack Compose, Android SDK, Room Database, Google ML Kit (On-Device OCR & Vision), Material 3, Google Play Console

Web & Full-Stack: Next.js 16 / 15 (Turbopack, Server Components, Server Actions, App Router), React 19, Tailwind CSS (v3/v4), Framer Motion, Zustand, Recharts, Radix UI

Backend & Database: Supabase (PostgreSQL, Row-Level Security / RLS, Auth, Realtime, Storage), FastAPI (Python), Node.js, Express, REST APIs, Database Migrations

Brand & Visual Identity: Logo Design, Brand Marks, Design Tokens, Typography Systems, Digital Brand Packaging, Figma

Growth & Search Infrastructure: Technical SEO, Google Business Architecture, Google Search Console, Meta & Google Ads Funnels, WhatsApp Lead Automation, Conversion Rate Optimization (CRO)

Fintech & Integrations: Paystack API (Checkout, Webhook Signature Verification, Split Settlement), WhatsApp Business Routing, PWA Offline-First Architecture

DevOps & Tooling: Git, GitHub Actions, Vercel, Turbopack, Vite, esbuild, Linux, Docker

FEATURED PRODUCTION ENGINEERING PROJECTS

Jetty Live in Production · Campus Marketplace & Housing Platform — 2026 · jetty.francisnaga.site

- Architected and launched a full-stack campus platform serving students and businesses at Nigeria Maritime University.
- Engineered an off-campus lodge directory with direct caretaker WhatsApp verification, removing intermediate agent fraud.
- Shipped student marketplace and service booking system for cadet gear, laundry, and hostel supplies.
- Stack: Next.js 15, React 19, TypeScript, Tailwind CSS, Supabase (PostgreSQL, Auth, Storage).

Inkto Live on Google Play · Legal Document Transcription & Audio Engine — 2026 · Google Play Store

- Designed and built a native Android utility that converts physical documents and voice notes into structured editable text.
- Integrated on-device ML Kit OCR with perspective edge detection for instantaneous offline document scanning.
- Implemented local-first Room database architecture with one-tap export to formatted PDF and DOCX files.
- Stack: Kotlin, Jetpack Compose, Android SDK, Room DB, ML Kit, Supabase.

CemGuard Open Source · Industrial Reliability Decision-Support Platform — 2026 · github.com/francisnaga/CemGuard

- Engineered predictive maintenance and telemetry decision-support platform for continuous-process plants and marine engineering.
- Linked physics-engine driven digital twins mathematically to live telemetry with Weibull failure distribution calculations.
- Built real-time financial risk translator converting mechanical degradation to plant downtime exposure at ₦54M/hour.
- Stack: Next.js 15, TypeScript, Tailwind CSS, Recharts, Zustand, Supabase.

InvoiceFlow (NCB) Live on Vercel · Automated Invoicing & Nigerian Tax Compliance Suite — 2026 · github.com/francisnaga/INVOICEFLOW

- Engineered an automated billing, client ledger, and tax calculation suite built for Nigerian contractors and SMEs.
- Integrated full Paystack settlement rails with webhook event reconciliation and dynamic VAT (7.5%) / WHT compliance.
- Implemented on-the-fly PDF invoice generation and WhatsApp delivery routing for instant client payment collection.
- Stack: Next.js 16 (Turbopack), TypeScript, Paystack API, Supabase (PostgreSQL), Tailwind CSS.

Recall PWA · Offline-First Revision & Exam Preparation Platform — 2026 · github.com/BuildItt-Inc/definam-pwa

- Developed offline-first revision platform with active recall study decks for engineering students in low-connectivity areas.
- Built FastAPI REST backend paired with client-side caching Service Workers for zero-latency question retrieval.
- Stack: Next.js PWA, FastAPI, Python, PostgreSQL.

EDUCATION & PROFESSIONAL CERTIFICATIONS

Nigeria Maritime University (NMU) · B.Eng. in Marine Engineering — Okerenkoko, Delta State · Class of 2026

- Specialization in marine power systems, mechanical reliability, fluid dynamics, and automated industrial monitoring.

NIIT (National Institute of Information Technology) Certified · Certificate in Python & Web Development — Professional Training & Certification

- Comprehensive professional certification curriculum covering core Python programming, object-oriented software engineering principles, database integration, and modern full-stack web development.
